Flutter Developer with over 2+ years of experience building and publishing high-performance cross-platform mobile apps. Skilled in Dart, Firebase, REST APIs, and advanced state management using Riverpod, Getx and Provider. Proven expertise in implementing clean architecture, integrating AI modules, and optimizing mobile performance. Committed to writing robust, testable code and optimizing mobile performance.

EXPERIENCE

Flutter Developer | Green System | June 2025 - Ongoing

- Collaborated on client-facing mobile applications, focusing on UI implementation and backend integration using Firebase and RESTful APIs.
- Refactored existing codebases to improve performance and implemented BLoC state management to ensure app stability.
- Worked in an Agile environment, delivering high-quality code updates within strict project timelines.

Flutter Developer | Eratech | Oct 2023 - June 2025 | Gujranwala, Pakistan

- Developed scalable Flutter applications utilizing BLoC architecture, enhancing performance and maintainability.
 - Implemented state management solutions with BLoC, Freezed, and Equatable, significantly improving application responsiveness.
 - Optimized code structure for reusability, resulting in a 30% reduction in development time for future projects.
-

TECHNICAL SKILLS:

Languages & Frameworks: Dart, Flutter, C++

State Management: Bloc, Provider, GetX

Database & Backend: Firebase, Firestore, Supabase, Hive, Firebase Cloud Functions, RESTful APIs,

JSON Tools & DevOps: Git, GitHub, Agile, Postman,

Debugging Design & Architecture: Clean Architecture, MVVM, MVC, Repository Pattern

Other: AI Integration, Responsive layouts, Material Design, CriticalThinking, Troubleshooting

PROJECTS

Resumate (AI Resume Platform)

Tech Stack: Flutter, BLoC, OpenRouter API, Syncfusion PDF, GetIt, Dartz.

Architected an enterprise-grade resume analyzer using Clean Architecture and functional programming.

- Developed a client-side document extraction pipeline utilizing Syncfusion Flutter PDF for asynchronous PDF parsing.
- Engineered an AI orchestration gateway via OpenRouter with a 14+ model fallback sequence and local JSON repair engine.
- Created an Interactive Refinement Studio for real-time manual editing and selective AI-suggestion application.
- Programmatically developed a document export system using the PDF package to generate high-resolution, ATS-friendly templates.

Montage (Personal Finance App)

Tech Stack: Flutter, Provider, Hive, Firestore, Google Generative AI, GoRouter, FL Chart.

Architected a robust finance manager using Clean Architecture and MVVM with glassmorphic UI components.

- Engineered an offline-first dual-database sync engine using localized Hive boxes linked asynchronously to Cloud Firestore.
- Integrated Gemini AI API to deliver context-aware, structured financial coaching based on transaction metrics.
- Built a custom expression-parsing keypad with bilingual voice dictation (Urdu/English) via the Speech-to-Text framework.
- Implemented secure data layers featuring biometric protection (FaceID/Fingerprint) and local file exporters (PDF/CSV).

Antique Furniture App

Tech Stack: Flutter, BLoC, Provider, Firestore, Hive, GoRouter, Clipdrop AI, Cloudinary, Mason.

Engineered an offline-first sync engine using Hive to cache and reconcile cart/wishlist data with Firestore.

- Integrated Clipdrop AI for automated background removal and Cloudinary for real-time CDN image optimization.
- Developed a camera-driven Room Preview feature supporting multi-touch gesture manipulation of 2D assets.
- Created a custom Mason CLI brick to automate boilerplate generation across data, domain, and UI layers.

Medic (Telehealth Platform)

Tech Stack: Flutter, BLoC, Firestore, Supabase, Google ML Kit, GoRouter.

Architected a dual-role (Patient/Doctor) app using Clean Architecture with functional error handling.

- Built a non-device AI image pipeline via Google ML Kit and pixel analysis to validate profile photos.
- Implemented a concurrency-safe booking engine using Firestore transactions to prevent double-booking.
- Unified Firebase databases and Supabase Storage into a secure, hybrid multi-cloud infrastructure.
- Engineered atomic database triggers for real-time review aggregations and role-aware notifications.

CollabTasker (Collaborative PM Tool)

Tech Stack: Flutter, GetX, Firebase (Auth/Firestore/FCM), GoRouter, Flutter ScreenUtil.

Architected a cross-platform, real-time workspace and task manager using a Feature-First Clean Architecture.

- Implemented a reactive, cross-device sync layer via Firestore Streams combined with dynamic role-based access tokens.
- Developed a scalable on-scroll paginated fetch system that batches document collection reads into pages of 10.
- Integrated Firebase Cloud Messaging (FCM) with local notifications for role-mapped alerts in background and foreground.

ADHD Ally | AI-Powered Task App

Tech Stack: Flutter, Firebase, Google Generative AI

Engineered a comprehensive ADHD-support mobile application to enhance user productivity through AI-driven task management.

- Integrated Google Generative AI for real-time, personalized task decomposition, reducing user friction in complex workflows.
- Built a scalable, real-time backend using Firebase, ensuring high data availability and secure user session management.
- Developed advanced mobile-native features, including background task scheduling and distraction-free 'Focus Modes' to boost user engagement.

EDUCATION

Bachelor of Information Technology

GC University

Relevant coursework in Mobile App Development, UI/UX Design, Software Engineering

LANGUAGES

-
- English (Fluent)
 - Urdu (Fluent)
